PROFESSIONAL SUMMARY

Network Engineer with extensive hands-on enterprise networking and SDN automation experiences via Huawei networking solutions (utilize devices such as switches, AC, AP & iMaster NCE SDN controllers). Proven track record in implementations of large-scale enterprise campus and data center networking projects for organizations. Experienced in modern cloud technologies & DevOps practices such as AWS, Terraform IaC, containerization (Docker & Kubernetes) and CI/CD pipelines (GitLab CI, GitLab Actions, BitBucket Pipelines). Complements deep infrastructure architecture with practical full-stack software development experience across frontend and backend systems.

TECHNICAL SKILLS

- **Enterprise & DC Networking:** BGP, BGP-EVPN, OSPF, VXLAN, VLAN, STP, M-LAG, Link Aggregation (LACP), VPN, Stacking, Routing Policies, ACLs, DSCP/QoS, Network Security, Packet Analysis (Wireshark, tcpdump)
- **SDN & Hardware:** Huawei S-Series & CE-Series Switches, Huawei AirEngine AP & AC, iMaster NCE (Campus & Fabric SDN Controllers)
- **Cloud & DevOps:** AWS (VPC, Transit Gateway, Route 53, ALB/NLB, EC2, IAM, S3, etc.), Terraform (IaC), Docker, Kubernetes, ArgoCD, CI/CD (GitLab CI, GitHub Actions, BitBucket Pipelines), Nginx, Portainer, Linux (Ubuntu, Debian, Kali)
- **Programming & Automation:** Python (Network automation & scripting), Bash/Shell scripting, TypeScript, JavaScript, SQL, Git
- **Full-Stack Web Development:** Next.js, React, NestJS, RESTful APIs, PostgreSQL, MySQL, MongoDB, Supabase

CERTIFICATIONS

- **AWS Certified Solutions Architect – Associate (SAA-C03)** | Amazon Web Services (AWS) — Issued 2026
- **HCIA-Datcom Certification** | Huawei Technologies — Issued 2024
- **Microsoft Certified: Azure Fundamentals (AZ-900)** | Microsoft — Issued 2022
- **AWS Academy Graduate – Cloud Foundations** | Amazon Web Services (AWS) — Issued 2021

PROFESSIONAL EXPERIENCE

Network Engineer | Huawei International Pte Ltd

Singapore | May 2024 – May 2026

- **Enterprise Projects Post-Sales Delivery:** Provided low-level network design (LLD) documents to customers, conducted staging feasibility tests and led post-sales delivery efforts across enterprise environments.
- **Data Center SDN Modernization:** Migrated legacy three-tier data center infrastructures to high-capacity BGP-EVPN VXLAN fabric architectures orchestrated via Huawei iMaster NCE Fabric which improves north-south, east-west traffic flow and tenant isolation.
- **Campus SDN & Automated Provisioning:** Implemented centralized SDN controllers (iMaster NCE Campus) to automate configuration provisioning, access control and telemetry across campus distribution/access layers and wireless infrastructures.
- **Vendor Migration & Cutover:** Led critical customer migration cutovers from third-party vendor platforms (e.g., Cisco) to modern Huawei enterprise architectures with minimal scheduled downtime.

Software Engineer | UniLah The Student App

Kuala Lumpur, Malaysia | Nov 2023 – Jun 2024

- **Backend Development:** Developed scalable backend RESTful APIs using NestJS and TypeScript, interfacing with relational database management systems (PostgreSQL) for various CRUD operations.
- **Frontend Development:** Developed core modules for the UniLah Overseas Campus platform and admin management portal using React, TypeScript, and Tailwind CSS.
- **Mobile Enhancement & System Testing:** Enhanced mobile client features via React Native and conducted User Acceptance Testing (UAT) to test different components across mobile and web interfaces.

ENTERPRISE INFRASTRUCTURE & CLOUD/SOFTWARE PROJECTS

- **Port of Singapore Authority (PSA):**
 - Delivered campus network migration projects (Distribution and Access layer) by migrating existing Cisco to new Huawei equipment together with implementing Huawei's iMaster NCE Campus SDN solution.
 - Delivered data center network migration project (from traditional three-tier network to modern BGP EVPN VXLAN Fabric architecture) together with implementing Huawei's iMaster NCE Fabric SDN solution.
- **National University of Singapore (NUS):**
 - Delivered WLAN network new-build projects for student hostels and guest hotels. Provisioned new network infrastructure for various staff services to be deployed on. Delivered high-speed WiFi network with low latency, large coverage and high bandwidth. Implemented Huawei's iMaster NCE Campus SDN solution to manage and provision all Huawei device equipment.
- **Jurong Town Corporation (JTC):**
 - Delivered large-scale campus network new-build project for client's newly digital district site. Provisioned new network infrastructure for different services to run on. Delivered high-speed WiFi network with large coverage, high bandwidth and seamless roaming. Implemented Huawei's iMaster NCE Campus SDN solution to manage and provision all Huawei device equipment.
- **ConX Agency:**
 - Architected and delivered a full-stack internal admin management system utilizing Next.js, NestJS and PostgreSQL. Provisioned online-hosted infrastructures (using Supabase for DB and Railway for infrastructure) & automated CI/CD deployment pipelines, optimized database queries for complex operational data and collaborated with stakeholders on technical roadmaps, infrastructure scaling and requirement feasibilities.

EDUCATION

Bachelor of Computer Science (First Class Honours) | Asia Pacific University (APU)

Malaysia | Nov 2021 – Mar 2024

- **Academic Excellence:** CGPA: 3.8 / 4.0 | Vice Chancellor's Honors List, APU Malaysian Scholarship & Merit Award Holder

Diploma in ICT (Software Engineering) (First Class Honours) | Asia Pacific University (APU)

Malaysia | May 2019 – Jul 2021

- **Academic Excellence:** CGPA: 3.93 / 4.0 | First Class Honor, APU Malaysian Scholarship & Merit Award Holder

LEADERSHIP & EXTRACURRICULAR

- **Board of Event Management, APU IEEE Society (Nov 2022 – Mar 2024):** Organized various technical talks (by international and industry guest speakers) and hands-on workshops covering Cloud Computing, AI, and Database Architectures.
- **Volunteer Staff, Comic Fiesta (Dec 2023 – 2025):** Facilitated crowd safety operations, large-scale traffic flow, and attendee support for major public exhibitions.

LANGUAGES

- **English** – Native fluency in both read and write
- **Chinese** – Native fluency in both read and write
- **Malay** – Limited working proficiency in both read and write
